PROFESSIONAL SUMMARY

Senior Frontend Engineer with 8+ years of experience designing and delivering scalable web applications using Angular, TypeScript, and modern frontend architecture practices. Experience delivering enterprise-scale frontend applications across gaming, finance, banking, education, and enterprise platforms, with a strong focus on performance optimization, maintainability, and intuitive user experiences. Proven ability to develop modular UI systems, optimize application performance, and collaborate closely with product, design, and backend teams in agile environments. Currently building AI-integrated products using Python, LangChain, and LLM APIs — combining frontend engineering with generative AI development.

Core Skills

- **Frontend:** Angular (2–16), TypeScript, JavaScript, HTML5, CSS3, Bootstrap
- **Frontend Architecture:** Component Architecture, RxJS, Angular Signals, Lazy Loading, Performance Optimization
- **Visualization & UI Libraries:** D3.js, Kendo UI, Phaser2, Phaser3, PixiJs
- **Tools & Platform:** Git, GitHub, Azure Devops, Agile/Scrum
- **AI & GenAI Development (Learning & Building):** Python, FastAPI, Generative AI, LLM API Integration (OpenAI, Gemini), LangChain, Prompt Engineering.
- **Development Practices:** Agile & Scrum Methodologies, Clean & Scalable Code Practices, TDD CI/CD, UI/UX, Data Structure and Algorithms, System Design, Object Oriented Programming(OPPs)

WORK EXPERIENCE

Associate Consultant | Senior UI Developer

Tata Consultancy Services(TCS) | Sept 2025 – Present

- Maintain and enhance enterprise healthcare web applications built with Angular and TypeScript, ensuring reliability and performance in production environments.
- Investigate and resolve complex UI defects across multiple application modules, improving stability and user experience for internal and external users.
- Identified performance bottlenecks and implemented optimizations (lazy loading, change detection tuning), improving page load time by 20–25%.
- Collaborate with backend engineers, QA teams, and product stakeholders to triage production issues and deliver timely fixes in agile sprint cycles.
- Refactor legacy UI components and improve code quality, enhancing maintainability and reducing technical debt across the frontend codebase.
- Participate in sprint planning, code reviews, and technical discussions to support continuous improvement of the application architecture and development practices.
- Technologies: - Angular 14, JavaScript, Git, GitHub, Azure, HTML, CSS, Bootstrap, Agile, Typescript

Senior Associate | Lead UI Developer

PwC India | Aug 2021 – Aug 2025

- Design and develop visually appealing and responsive UI components, focusing on functionality, aesthetics, and usability, with a primary focus on Angular frameworks.
- Designed and developed scalable Angular-based UI systems and reusable components, improving development efficiency by 35%.
- Created finance dashboards that enables administrators to visualize the current financial status through interactive charts(using **d3**) and graphs enhancing decision-making capabilities.
- Implemented **state management** solutions using **RxJS**, leveraging **observables**, **Angular Signals** to efficiently manage application state and ensure seamless data flow in Angular applications.
- Collaborate with business analysts to plan, organize, and prioritize UI tasks, establishing a well-structured development road-map.
- Successfully upgraded several applications from earlier Angular versions to Angular 14, Angular 16 enhancing performance, security, and user experience.
- Created **custom pipes** and **libraries**, leveraged **web workers** and implemented **lazy loading techniques** to optimize application performance.

- Technologies: - Angular 16, JavaScript , Kendo, Git, GitHub, Azure, HTML, CSS, Bootstrap, Agile, Typescript

Game Developer | Game Owner

Ingenuity Gaming | Jan 2020 – Jul 2021

- Took complete ownership of the game development process, collaborating with game artists to integrate design elements and assets, and working with mathematics teams to implement game rules.
- Developed game components and features utilizing object-oriented programming (OOP) principles to ensure scalability and maintainability of the code base.
- Identified UI performance bottlenecks and implemented optimizations, including preload and post-load techniques, to enhance gameplay fluidity and reduce loading times upto 30%.
- Worked closely with product owners and managers to define and implement a structured road-map, ensuring efficient game development.
- Developed and launched multiple production slot games including All Sports, All About Christmas, Book of Inti, and 5 Fruit Frenzy, used across online gaming platforms.
- Technologies: - JavaScript, Typescript, Phaser2, Phaser3, pixi.js , Git, GitHub, Azure, HTML5, Agile

Associate Engineer | UI Developer

Tech Mahindra Ltd | Feb 2017 – Dec 2019

- Requirement understanding, application design, development and unit testing.
- Coordinate with the Product Owner and Development team.
- Facilitate different agile ceremonies encouraging and demanding self-organization from the development team, unit testing, code reviews and technical help to the team.
- Keeping Application Lifecycle Management (ALM) updated and following scrum practices, ensuring all Sprint activities are time boxed.
- Technologies: Java, Angular2, Bootstrap, Scrum, Agile Methodology.

WORK SAMPLE(S):

- **Project: RoleFit | 2026 (In Progress)**: AI-powered resume tailoring platform built with Angular 18 (frontend) and Python FastAPI (backend), integrating OpenAI and Gemini APIs for intelligent resume analysis and job-fit scoring.
- **Project: Giggly UI | Jan 2025**: Developed Giggly UI, a modern Angular-based UI component library designed to provide a playful yet professional user experience. It includes customization, responsive components such as buttons, drop-downs, and form elements, ensuring seamless integration with Angular forms. Deployed the project using Firebase for accessibility and scalability.

CERTIFICATIONS

- Gen AI & Agentic AI for Developers- IIT Patna(Feb 2026 - Ongoing)
- UI Design Specialization - California School of Arts (Aug 2023)

EDUCATION

- Executive MBA(2026) | Indian Institute of Management Amritsar(IIM)
- Bachelor of Computer Science and Engineering (2016) | Visvesvaraya Technological University

CO-CURRICULAR ACTIVITIES/ACHIEVEMENT

- All India ranked 328 in Coding-Ninjas hackathon.
- Winner of KVS state-level chess tournament.
- Represented college at the state level in chess for three years.
